高效助力开展文献写作和选刊投稿

——基于Web of Science(SCI)平台

科睿唯安 学术研究事业部 | 陈元方 | 2025年6月13日

目录

一、Web of Science平台资源简介

二、Web of Science & AI 融合

三、Web of Science助力一流的科学的研究

- 如何高效选题?
- 如何开展课题调研、理清发展脉络?
- 如何高效管理文献 & 写作?
- 如何选择合适的期刊进行投稿，加速成果发表?
- 如何全面了解期刊的影响力?

上机演示

Web of Science最独特的价值—引文索引(Citation Index)

Citation Indexes for Science

A New Dimension in Documentation
through Association of Ideas

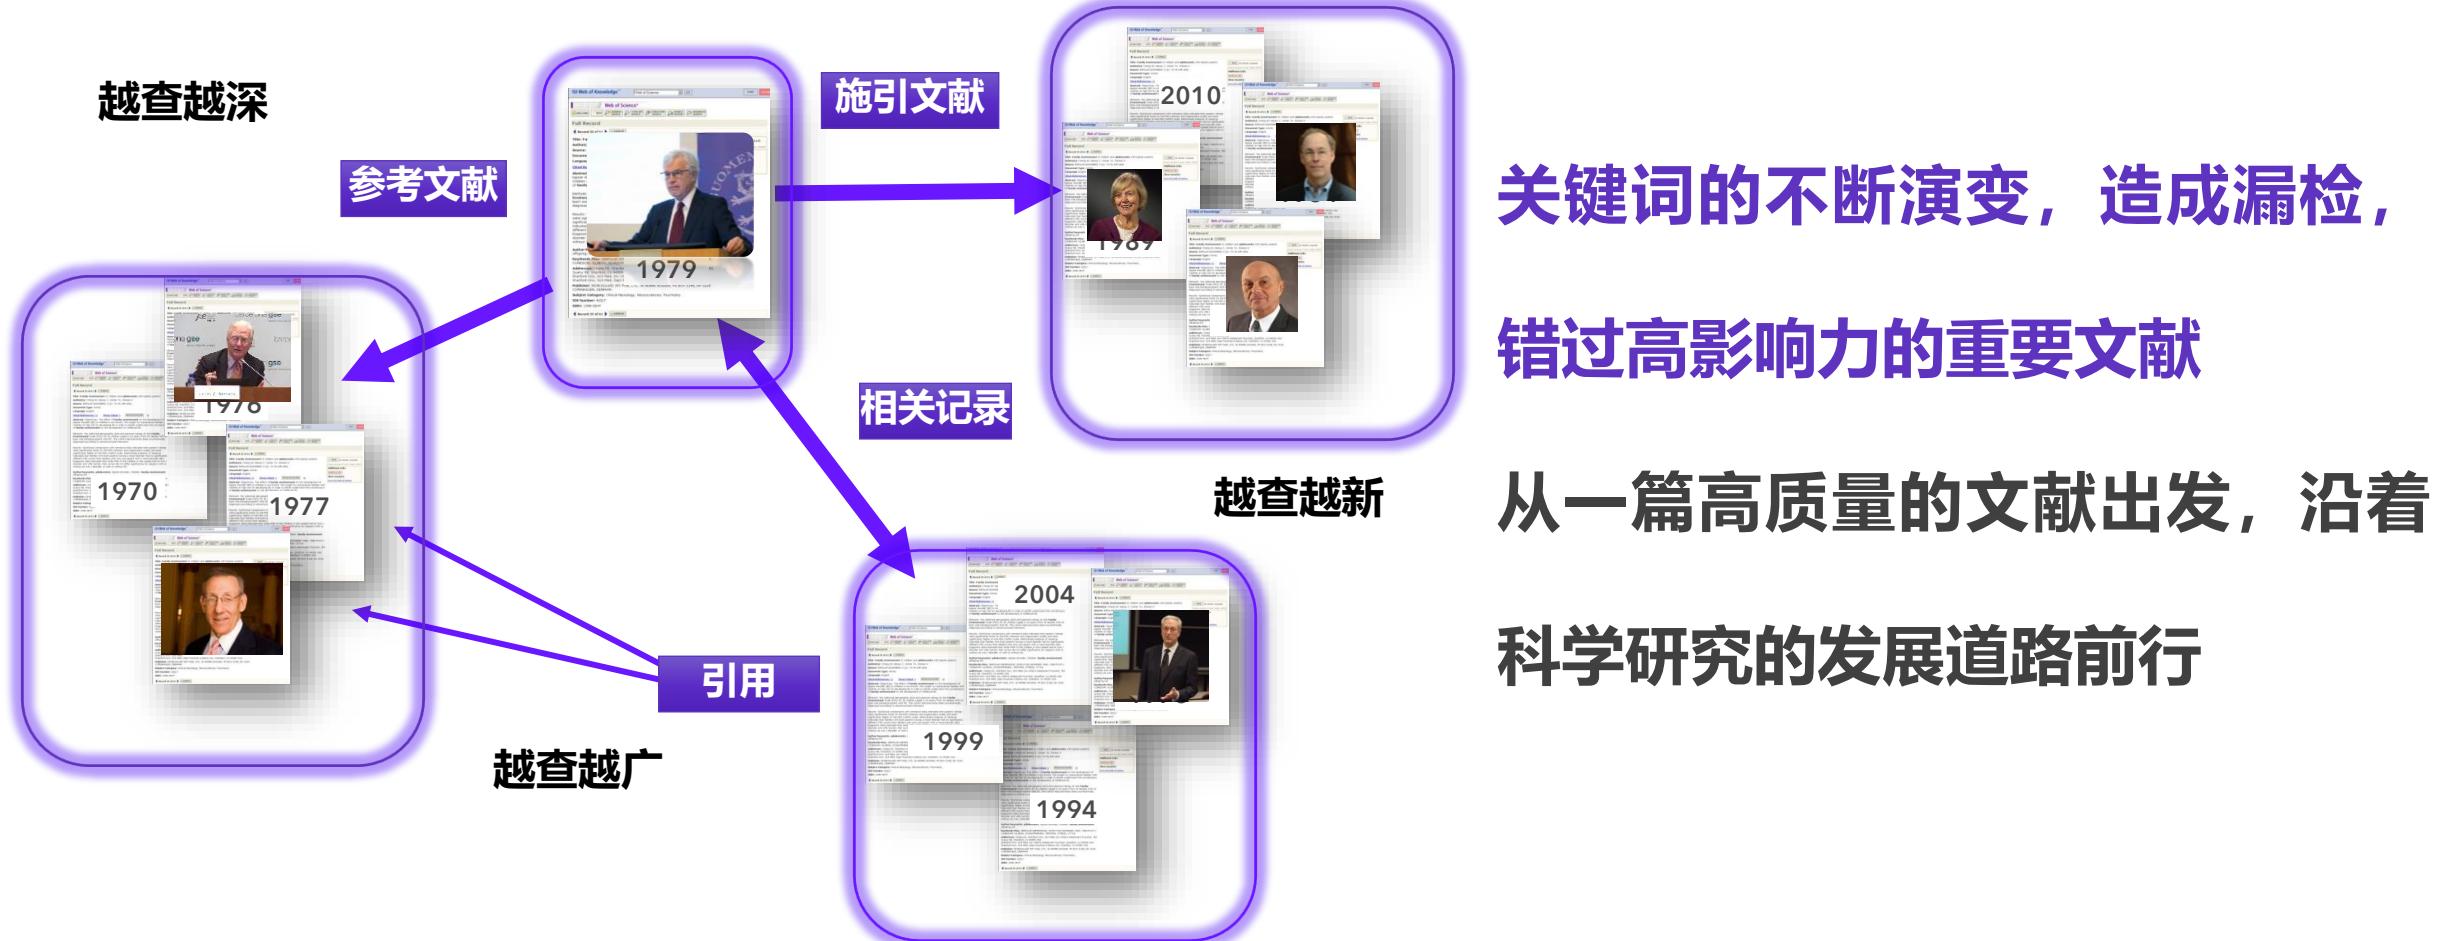

Eugene Garfield

"The uncritical citation of disputed data by a writer, whether it be deliberate or not, is a serious matter. Of course, knowingly propagandizing unsubstantiated claims is particularly abhorrent, but just as many naive students may be swayed by unfounded assertions presented by a writer who is unaware of the criticisms. Buried in scholarly journals, critical notes are increasingly likely to be overlooked with the passage of time, while the studies to which they pertain, having been reported more widely, are approach to subject control of the literature of science. By virtue of its different construction, it tends to bring together material that would never be collated by the usual subject indexing. It is best described as an association-of-ideas index, and it gives the reader as much leeway as he requires. Suggestiveness through association-of-ideas is offered by conventional subject indexes but only within the limits of a particular subject heading.
If one considers the book as the macro unit of thought and the periodical article

Dr. Garfield 1955年在 Science 发表论文提出将引文索引作为一种新的文献检索与分类工具：将一篇文献作为检索字段从而跟踪一个 Idea 的发展过程及学科之间的交叉渗透的关系。

引文索引

Web of Science & AI融合 新功能

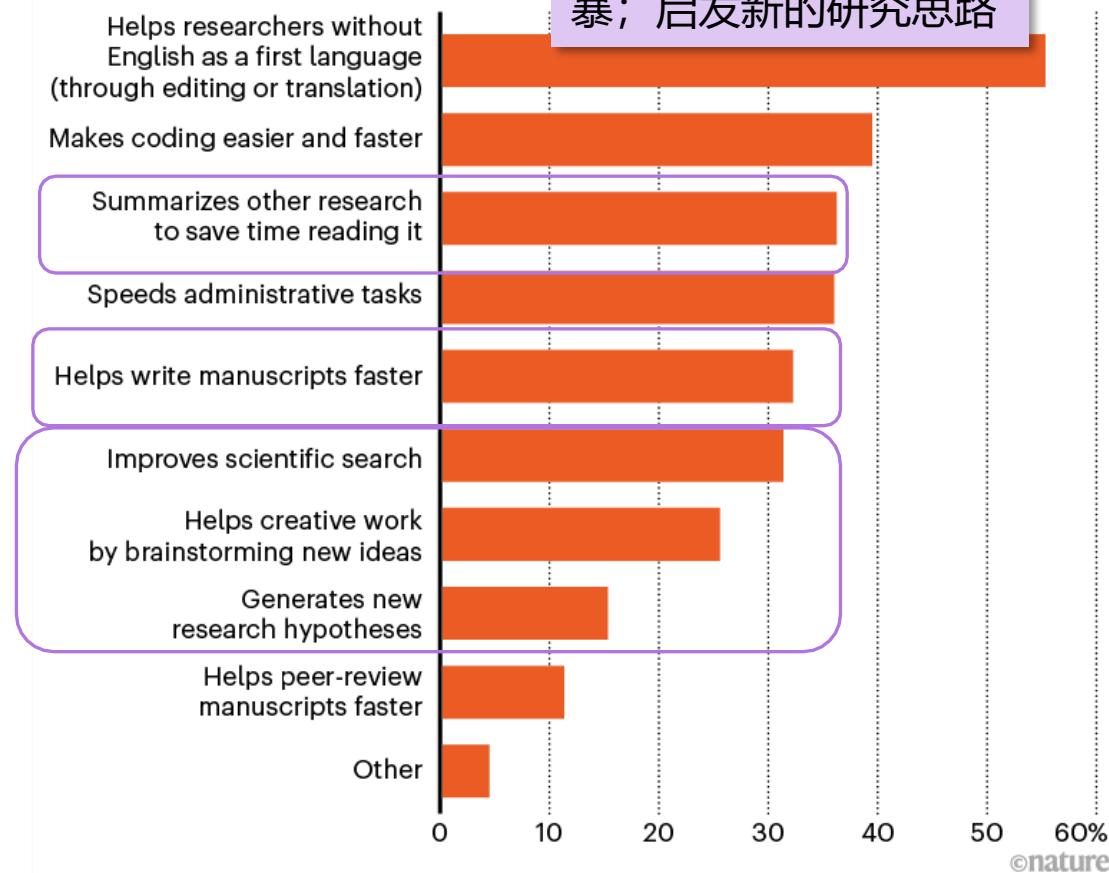

AI & 科研人员

生成式AI的益处及存在的问题

BENEFITS OF GENERATIVE AI

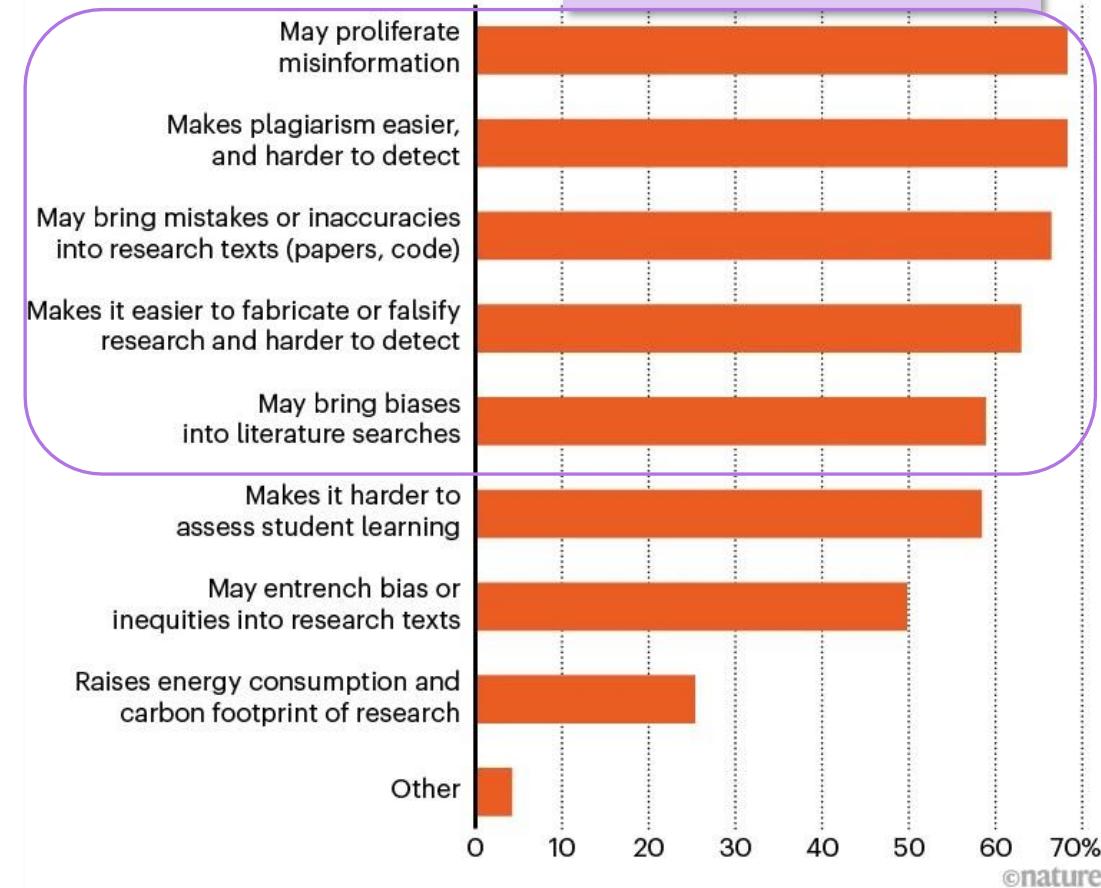

Q: What do you think are currently the big benefits of generative AI? (Choose all that apply.)

总结其他研究以节省阅读时间；辅助写论文；提高搜索效率；头脑风暴；启发新的研究思路

PROBLEMS OF GENERATIVE AI

Q: Where do you think generative AI may have negative impacts on research? (Choose all that apply.)

可能传播错误信息；更容易剽窃；在文献搜索的时候容易带来偏见。

通用型GenAI 工具 vs WOS研究助手

通用型GenAI工具

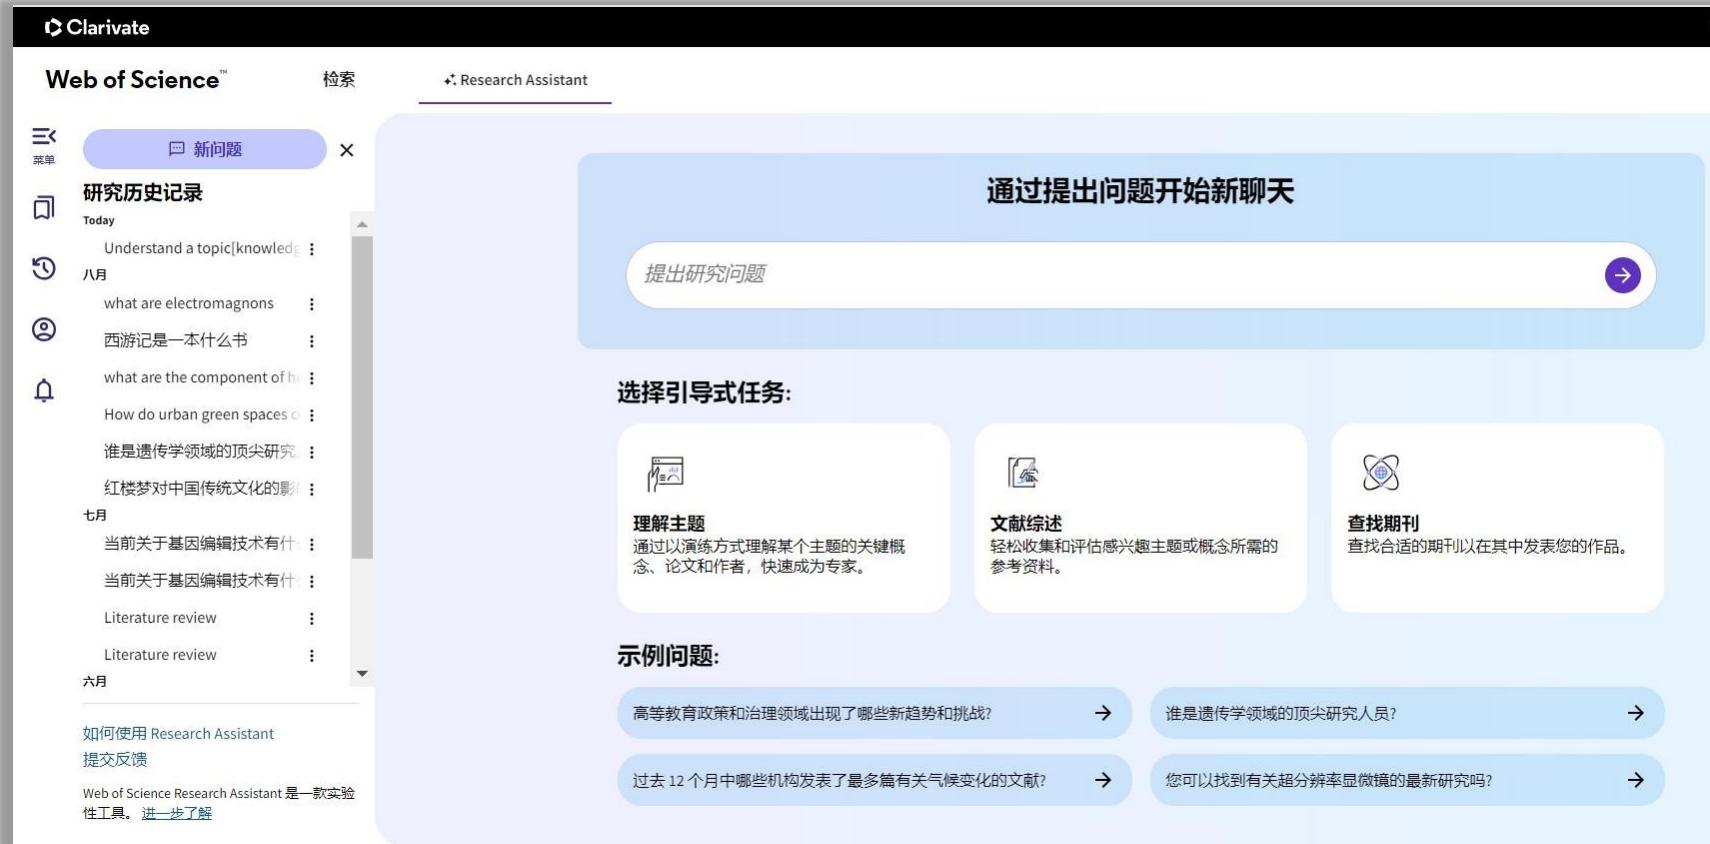

- 数据来源：公开的互联网数据、书籍和文献、对话数据、用户提供的数据
- 生成的结果：存在一本正经胡说八道的可能，需要进一步对结果和参考来源进行验证
- 目的：功能多样，可直接提供答案（即使没有答案也可以编造）

WOS Research Assistant（研究助手）

- 数据来源：**经过同行评审的文献数据 (WOSCC)**
- 生成的结果：可信、透明
- 目的：更高效、智能地利用文献信息进行科研，提供更多科研上的引导

Web of Science Research Assistant

更智能地助力研究发现

- ✓ 负责任的生成式人工智能研究助手
- ✓ 基于最值得信赖的引文索引数据库—WOS核心合集（经过严格遴选的同行评审期刊）
- ✓ 支持多语言搜索
- ✓ 引导式助您深入探索
- ✓ 交互式可视化展现

刚进入一个陌生领域， 如何快速入门？？？

该领域有哪些关键概念？

该领域有哪些重要的文献？

该领域有哪些活跃研究人员？

如何快速了解一篇文章的主要研究内容？

该领域整体的研究趋势是什么？

该领域有什么最新进展？

有哪些可以投稿的SCI/SSCI/AHCI期刊？

1. 研究助手：带您轻松探索新研究领域

通过提出问题开始新聊天

直接用中文/英文提出您的研究问题

选择引导式任务：

理解主题
通过以演练方式理解某个主题的关键概念、论文和作者，快速成为专家。

文献综述
轻松收集和评估参考资料。

示例问题：

高等教育政策和治理领域出现了哪些新趋势和挑战？

过去 12 个月中哪些机构发表了最多篇有关气候变化的文献？

基于WOS核心合集中的摘要信息快速生成回答，并对来源文献进行标引

语言习得有哪些不同的理论？ OW

语言习得的不同理论包括：对于研究语言习得中语言多样性的关注，需要建立新的习得研究基础设施[1]；Whitney在19世纪末的科学语言学中将语言习得作为研究的起点，提出语言始于语言习得，并持续演变以满足说话者的社会和个人需求[2]；学习理论和语言习得之间的独立发展阻碍了两个领域的进展，但最近开始将学习理论应用于语言，并利用语言学习数据推进领域通用学习理论[3]；Vygotsky的互动主义理论强调社会互动对儿童认知发展的重要性，对语言教师具有潜在的影响[7]；认知负荷理论实验性地测试了通过第二语言学习内容是否超过了减少内容习得的劣势，结果表明先用母语听内容有利于内容和语言习得[8]。综上所述，语言习得涉及多个理论，包括语言多样性、学习理论、互动主义理论和认知负荷理论。这些理论在不同方面解释了语言习得的复杂性，但目前仍没有一种理论能够全面解释母语习得的过程。

what are the latest advancements in Copper-induced tumor cell death?

QW

快速总结关于“铜诱导肿瘤细胞死亡”的最新进展

Recent advancements in copper-induced tumor cell death include the identification of cuproptosis as a novel form of regulated cell death [2]. Cuproptosis is tightly associated with mitochondrial respiration and oxidative stress. [查看 8 篇参考的文献](#) involves the interaction of copper with lipoylated proteins, leading to the regulation of oxidative stress, immune response, and apoptosis. cuproptosis-related genes and copper-containing compounds have been linked to the development of effective treatment strategies for cancer. The study of cuproptosis and its association with mitochondrial respiratory chain components is crucial for the development of new cancer treatments.

以下是在冠状病毒疫苗研发进展的文献综述：

介绍

冠状病毒疫苗的研发在全球范围内得到了广泛的关注和快速的发展。自COVID-19大流行以来，各国政府、学术机构和制药公司都加大了对疫苗研发的投入，力求在最短时间内开发出安全有效的疫苗以遏制疫情的蔓延。

共同主题/关键研究发现

- 疫苗技术的多样化：**在疫苗研发中，mRNA疫苗、病毒载体疫苗和灭活疫苗等多种技术平台得到了广泛应用。研究表明，mRNA疫苗因其快速开发周期和高效的免疫反应而受到特别关注[Zhao et al., 2020]; [Zhou et al., 2021]。
- 疫苗的安全性和有效性：**多项研究评估了不同疫苗在临床试验中的安全性和有效性，尤其是在应对不同病毒变异株时的表现。研究显示，尽管疫苗在减少病毒传播和重症病例方面取得了显著成效，但其对某些变异株的免疫效果有所下降[He et al., 2023]; [Hasan et al., 2023]。
- 全球合作与疫苗分配：**全球范围内的疫苗合作与分配问题也是研究的重点。尽管一些国家在疫苗生产和分发方面取得了进展，但疫苗获取的不平等问题依然存在[Yu et al., 2023]。
- 应对变异毒株的挑战：**随着新的变异株的出现，研究者们开始关注疫苗的重新设计，以提高其对变异株的有效性。特别是对刺突蛋白的突变进行了深入研究，以评估其对疫苗免疫反应的影响[He et al., 2023]。

研究中的空白

- 长效免疫研究：**尽管现有疫苗能够提供短期免疫保护，但其长效性尚未得到充分验证，特别是在不同人群中的持久性免疫效果[Messan et al., 2023]。
- 疫苗对特定人群的影响：**一些研究指出，特定人群如糖尿病患者在接种疫苗后可能会出现较弱的免疫反应，这需要进一步的研究以开发针对这些高风险人群的疫苗[Yuan et al., 2024]。

结论

冠状病毒疫苗的研发在短时间内取得了显著进展，特别是在技术创新和全球合作方面。然而，疫苗在应对变异株和提供长效保护方面仍面临挑战。未来的研究需要继续关注疫苗的改进和针对高风险人群的专项研究。

潜在假设

1. mRNA疫苗平台可以通过改进刺突蛋白编码序列，提高对新兴变异株的免疫效果。
2. 多剂量疫苗接种策略可能会增强对长期免疫的效果，尤其是在免疫反应较弱的人群中。
3. 全球疫苗生产和分配的不平等现象会影响全球疫情控制的整体效果。
4. 对疫苗免疫反应影响的个体差异可能与遗传因素和代谢疾病相关。
5. 新型疫苗技术，如病毒载体疫苗，将成为未来疫苗研发的主要方向，尤其是在应对新兴病毒变异株方面。

如何访问Web of Science?

The screenshot shows the homepage of the Harbin Institute of Technology Library website. The top navigation bar includes links for Home, Overview, Resources, Services, and Consultation. The Resources section is highlighted with a red box. Within Resources, there are two tabs: 'Chinese' and 'Foreign Language', with 'Foreign Language' also highlighted with a red box. A search bar is present above the main content area. The main content area features a large image of people at a library event and a sidebar with various links. A prominent blue box labeled 'Resources' contains a link to 'Imported Database'. Below this, there are sections for Chinese and Foreign Language resources, each with a list of databases. The 'Foreign Language' section is further expanded, showing links to EI, SCI, SSCI, JCR, and ESI databases, with 'SCI' also highlighted with a red box.

Web of Science (SCI) 在科研中的常见 应用场景

如何高效选题？

追踪领域研究前沿，把握最新进展

调研领域课题——科学选题

遵循原则：科学性、创新性、可行性、专业性以及应用性。

从科学前沿和研究热点中选题

从已有课题的延伸中选题

从学科渗透、交叉发展中选题

从领域中亟待解决的问题中选题

如“卡脖子”问题，“四个面向”为战略导向的横向课题

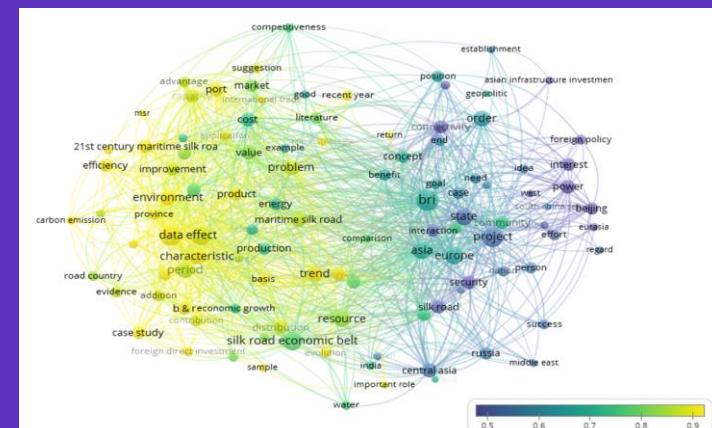

借助科研工具选题：

通过权威期刊，了解科技动态；

利用WoS的引文索引进行文献综述；

使用ESI高质量数据，了解研究热点；

利用InCites全方位分析课题信息。

从期刊投稿指南/征稿启示中拓展选题

The screenshot shows the homepage of the Journal of Power Sources. At the top, there is a green header bar with the journal title and a link to 'Supports open access'. Below the header, there are navigation links for 'Articles & Issues', 'About', 'Publish', and a search bar. A large sidebar on the left is titled 'Guide for authors' and contains sections for 'About the journal' (with links to 'Aims and scope', 'Article types', 'Peer review', and 'Open access') and 'Ethics and policies' (with a long list of items). The main content area features a section titled 'Aims and scope' which describes the journal's focus on electrochemical power sources and their applications. A red box highlights a bulleted list of application examples, which are then expanded into a larger list of 10 items.

Aims and scope

Journal of Power Sources is the journal for researchers and technologists interested in all aspects of the science, technology and applications of **sources of electrochemical power**. *Journal of Power Source* publishes original research and reviews in the field of electrochemical energy storage and conversion, including batteries, fuel cells, supercapacitors, and other electrochemical power sources.

Topics considered include the research and development of new materials and components for these devices.

Examples of applications of these electrochemical power sources include:

- 主题包括纳米材料和这些设备的新型组件的研究、开发和应用。这些电化学电源的应用示例包括：
- 便携式电子设备
- 电动和混合动力汽车
- 不间断电源（UPS）系统
- 可再生能源的储存
- 卫星和深空探测器
- 船只、无人机和飞机
- 可穿戴储能系统。

Authors are also welcome to submit manuscripts on other topics related to electrochemical energy storage and conversion, particularly SDG 7 (Affordable and clean energy).

This journal welcomes contributions from all fields of electrochemistry, including basic research, applied science, and engineering, as well as interdisciplinary studies.

从科学前沿和研究热点中选题

研究前沿报告 - 源于ESI数据信息

从2014年到2024年，科睿唯安与中国科学院每年联合发布研究前沿报告（Research Fronts）。

《2024研究前沿》遴选和展示了11大学科领域中的110个热点前沿和15个新兴前沿。报告以科睿唯安ESI数据库中的13318个研究前沿为起点，对2018-2023年的论文数据进行分析。

此外研究人员还对28个重点研究前沿进行了详细解读。

The search input field is labeled '主题' (Subject) and contains the query '“High entropy alloy*” or “High-entropy alloy*” or HEA or HEAs'. A red box highlights this input field. To the right of the input field is a placeholder '示例: oil spill* mediterranean' and a clear button 'X'. On the left, a sidebar lists search fields: '所有字段' (All Fields), '主题' (Subject) (selected), '标题' (Title), '作者' (Author), '出版物标题' (Publication Title), '出版年' (Publication Year), '所属机构' (Affiliation), '基金资助机构' (Funding Organization), and '出版商' (Publisher). A red box also highlights the '主题' field in the sidebar. Below the search input field, there is a '高级检索' (Advanced Search) section with a dropdown menu showing '示例: 2001 or 1997-1999' and '1900-2024'. A large purple callout box on the right side provides instructions: '检索字段: 标题或主题 (检索标题、摘要、作者关键词、Keywords Plus) 、 出版年 检索式: “High entropy alloy*” or “High-entropy alloy*” or HEA or HEAs 数据库范围: Web of Science核心合集/ SCIE & SSCI & AHCI 时间范围: 1900-2024、 1900-2025'.

此高级技术可帮助您更快地理解主题并找到相关文献。

检索字段: 标题或主题 (检索标题、摘要、作者关键词、Keywords Plus) 、
出版年
检索式: “High entropy alloy*” or “High-entropy alloy*” or HEA or HEAs

□ 1 A critical review of high entropy alloys and related concepts

Miracle, DB and Senkov, ON
Jan 1 2017 | ACTA MATERIALIA ▾ 122, pp.448-511

High entropy alloys (HEAs) are barely 12 years old. The field has stimulated new ideas and has inspired the exploration of the vast composition space offered by multi-principal element alloys (MPEAs). Here we present a critical review of this field, with the intent of summarizing key findings, uncovering major trends and providing guidance for future effort ... 显示更多 ▾

1 Atomistic simulations of dislocation behaviors in Cr-Mn-Fe-Co-Ni high-entropy alloys with different Cr/Ni ratio
Tian, Y and Chen, F
Jun 10 2025 | JOURNAL OF MATERIALS SCIENCE & TECHNOLOGY ▾ 220, pp.30-42
Pronounced compositional fluctuations in CrMnFeCoNi high-entropy alloys (HEAs) lead to variations of the stacking-fault energy (SFE), which dominates the dislocation behavior and mechanical properties. However, studies on the underlying dislocation behaviors and deformation mechanisms as a function of composition (Cr/Ni ratio) within CrMnFeCoN ... 显示更多 ▾

EndNote online——保存至Endnote online

The screenshot shows the EndNote online web interface. On the left, there's a sidebar with a '快速检索' (Quick Search) section containing a search bar and dropdown for '检索范围' (Search Scope). Below it is a '我的参考文献' (My References) section listing categories like '我的所有参考文献 (275)', '未归档 (0)', '临时列表 (0)', '回收站 (5)' (with a '清空' button), and various groups such as 'abd (12)', 'axon reg (8)', and 'newly added (54)'. A purple box highlights this sidebar area. In the center, a large purple banner says '有效地组织管理手头的参考文献' (Effectively organize and manage your references). To its right is a '快速检索' (Quick Search) panel with dropdowns for '作者', '出版年', and '标题', and buttons for '全部' (All), '当前页' (Current Page), '添加到组...' (Add to Group), '复制到剪贴板' (Copy to Clipboard), and '开始' (Start). Below this is another purple banner with the text '我的所' (My...) followed by '每页显示' (Items per page) and a dropdown set to '10'. The main content area shows a list of references:

作者	出版年	标题
	year	<Alguire-1998-A 添加到文献库: 25 Ma
	year	<Singh-2020-Exj 添加到文献库: 25 Ma
Abdul-Muneer, P. M.	year 2021	abisjdl jdakdl abc 添加到文献库: 25 Ma

On the right, there's a '上传文件附件' (Upload File Attachment) dialog box. It shows '已用空间: 0.00 KB 可用空间: 无限制' (Used space: 0.00 KB Available space: Unlimited) and instructions to '单击 "浏览" 选择要上传的文件' (Click 'Browse' to select the file to upload). It lists five file upload slots, each with a 'Choose File' button and 'No file chosen'. At the bottom of the dialog, it says '已选中 0 个附件' (0 attachments selected). A purple box highlights the 'Choose File' button in the third slot. The top right corner of the dialog has a 'EN' button and a '关闭' (Close) button. The top navigation bar includes '我的参考文献' (selected), '收集', '组织', '格式化', '匹配', '选项', and '下载项'. The top right also has a user profile icon and a '显示快速入门指南' (Show Quick Start Guide) link. The bottom left corner features the Clarivate logo.

Help Center

Browse, search, and explore journals indexed in the Web of Science

The Master Journal List is an invaluable tool to help you to find the right journal for your needs across multiple indices hosted on the Web of Science platform. Spanning all disciplines and regions, Web of Science Core Collection is a carefully curated collection of journals selected with care by an expert team of in-house editors. Web of Science Core Collection includes over 13,000 journals from more than 100 countries, reflecting editorial rigor and best practice. As well as the Web of Science Core Collection, you can search Biological Abstracts, BIOSIS Previews, Zootological Record, and Current Contents Connect.

以下是与您文献相匹配的前 5 种期刊。

谢谢！现在，提供您的摘要。摘要是对您文献和研究的简要说明。

Research suggests that providing children with activities that involve movement of the arm or body can improve letter knowledge. Little is known, however, as to the extent to which such exercises are effective. This study examined the effectiveness of specific arm or body movements on letter knowledge in 5-year-old pre-readers. Using a preregistered randomized-controlled design, we compared the educational effects of 6-week-long training sessions with arm-body training (vs. letter-only training) and arm training (vs. arm-body training) on five measures of letter knowledge. Results showed that integrating arm movement exercises into letter knowledge training was more effective than letter-only training, while both types of training were most beneficial to students with initially low pre-reading skills. These findings suggest that combining letter knowledge designs with arm-body training may be a promising approach to consolidate and replicate present findings, while highlighting the importance of movement in letter learning.

谢谢！我现在根据关键词检索与您的标题和摘要相匹配的期刊。

Technologies for Printing Sensors and Electronics Over Large Flexible Substrates: A Review

Saleem Khan, Leandro Lorenzelli, Member, IEEE, and Ravinder S. Dahiya, Senior Member, IEEE

Abstract—Printing sensors and electronics over flexible substrates are an area of significant interest due to low-cost fabrication and possibility of obtaining multifunctional electronics over large areas. Over the years, a number of printing technologies have been developed to pattern a wide range of electronic materials on diverse substrates. As further expansion of printed technologies is expected in future for sensors and electronics, it is opportune to review the common features, the complementarities, and the challenges associated with various printing technologies. This paper presents a comprehensive review of various printing technologies, commonly used substrates and electronic materials. Various solution/dry printing and contact/noncontact printing technologies have been assessed on the basis of technological, materials, and process-related developments in the field. Critical challenges in various printing techniques and potential research directions have been highlighted. Possibilities of merging various printing methodologies have been explored to extend the lab developed standalone systems to high-speed roll-to-roll production lines for system level integration.

Index Terms—Printed sensors, printed electronics, flexible electronics, large area electronics, roll-to-roll, dispersion solution.

I. INTRODUCTION

PRINTING technologies are aiding and revolutionizing the burgeoning field of flexible/bendable sensors and electronics by providing cost-effective routes for processing diverse electronic materials at temperatures that are compatible with plastic substrates. Simplified processing steps, reduced materials wastage, low fabrication costs and simple patterning techniques make printing technologies very attractive for the cost-effective manufacturing [16]–[18]. These features of printed electronics have allowed researchers to explore new avenues for materials processing and to develop sensors and systems on *one or more surfaces*, which otherwise

are difficult to realize with the conventional wafer-based fabrication techniques. The printed electronics on flexible substrates will enable conformable sensitive electronic systems such as electronic skin that can be wrapped around the body of a robot or prosthetic hands [20]–[25]. Printed electronics on polymer substrates has also opened new avenues for low-cost fabrication of electronics on areas larger than the standard wafers available commercially. In accordance with the electronics industry roadmap, the research in this field is slowly inching towards a merge of well-established microelectronics and the age-old printing technologies [26]. This is evidenced by development of devices such as, large area printed pressure sensors [5], [27]–[29], radio frequency identification tags (RFID) [11], [12], solar cells [30], light emitting diodes (LED) [13] and transistors [14].

Traditional approaches for printing electronics and sensors involve bringing pre-patterned parts of a module in contact with the flexible (or non-flexible) substrates and transferring

教学与培训

1、新生入馆教育

图书馆是知识的宝库，高校图书馆是一所大学的文献信息服务中心。合理的、有效的利用图书馆，将对其今后的学习以及综合素质的提高起着重要的作用。图书馆培训教育，通过演示、讲解并发放“读者指南”手册等形式，引导新生熟悉图书馆环境，为以后的自学打下良好的基础。欢迎广大新生积极参加，并提出宝贵意见与建议。请点击以下网址查看[《新生入馆自助手册》](#)

2、专题系列讲座

我校图书馆常年坚持面对我校的师生开设不同类型的培训讲座，培训讲座分为数据库商提供的专场培训和图书馆馆员做的培训两种。前发布，并且张贴在图书馆大厅和各学院的布告栏中。

此外，还会针对各院系的要求进行不定期的专业资源培训与讲座，地点为广大师生服务，欢迎各院系教师前来联系。
